Approvals Electromagnetic Compatibility

United States

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician

CAUTION: Changes or modifications to this equipment not expressly approved by the party responsible for compliance (Pitney Bowes) could void the user's authority to operate the equipment.

Canada

This Class B digital apparatus complies with Canadian ICES-003. Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

European Union (CE)

It is certified that this product complies with all applicable Directives of the European Union.

Use only the AC mains cable supplied with the product. For a formal Declaration of Conformity please contact Pitney Bowes Compliance Engineering Department, Pitney Bowes Limited, Elizabeth Way, Harlow, Essex CM19 5BD England. Telephone +44 (0)1279 426731

Follow the normal safety precautions for all office equipment:

- Use only Pitney Bowes approved supplies, in particular aerosol dusters. Improper storage and use of aerosol dusters or flammable aerosol dusters, can cause an explosive-like condition that could result in a personal injury and/or property damage. Never use aerosol dusters labeled flammable and always read instructions and safety precautions on the duster container label.
- Material Safety Data Sheets can be obtained on the web or from our Supply Line™. Refer to the Contact Information List for more information.
- Avoid touching moving parts or materials while the machine is in use. Keep hands, loose clothing, jewelry and long hair away from all moving parts.
- Do not remove covers or defeat safety interlock switches. Covers enclose hazardous parts that should only be accessed by properly trained service personnel. Immediately report to service any damaged or non-functioning components that renders the unit unsafe.
- Place the unit in an accessible location to allow for proper venting of the equipment and to facilitate servicing.
- Use the AC adaptor/power supply included with this letter opener. Third-party adaptors may damage the letter opener.
- Connect the AC adaptor/power supply power cord into a properly wired/grounded wall outlet located near the machine and easily accessible.
- The AC adaptor/power cord is the primary means to disconnect the machine from the AC supply.
- Do not route the AC adaptor/power supply cords over sharp edges or trapped between furniture.
- Be certain the area in front of the wall outlet into which the AC adaptor/power supply is connected is free from obstruction.
- Before clearing a jam, be sure machine mechanisms come to a stop.
- When removing jammed material, avoid using too much force to protect against minor personal injury and damaging equipment.
- To prevent overheating, do not cover the vent openings.
- Avoid using wall outlets that are controlled by wall switches, or shared with other equipment. If a wall outlet controlled by a wall switch is used, mail could be interrupted if the letter opener is plugged in when the wall switch is used to turn power off.
- Operation of this equipment without periodic maintenance will inhibit optimum operating performance and could cause the equipment to malfunction. Contact your machine supplier for required service schedule.
- Read all instructions before attempting to operate the equipment.
- Use this equipment only for its intended purpose.
- Always follow the specific occupational safety and health standards for your workplace.

IMPORTANT: Please review the Safety Notes before setting up the DL50.

NOTE: Attach the appropriate adapter.

The DL50 Letter Opener cleanly opens an envelope by cutting a thin paper strip off of the top. The DL50 then stacks the envelope, and separates the paper strips into the waste area on the stacker tray.

Follow the steps below to open an envelope.

1. Tap the envelope so that contents fall away from the edge of the envelope to be opened.
IMPORTANT: Make sure that coins, staples, paper clips, or other objects that may damage the knives of the letter opener are tapped away from the edge of the envelope to be opened.
2. Place the envelope on the feed deck so the edge to be opened is against the feeder wall.
3. Slide the envelope to the right. The letter opener will open the envelope and deposit it in the stacker tray.

Emptying the Stacker Tray

Remove the stacker tray and empty the waste area frequently, as a large accumulation of paper strips can interfere with proper operation of the letter opener.

Clearing a Jam

1. Unplug the power cord to stop the letter opener from running.
2. Remove the envelope by pulling back to the left.
3. Plug the power cord back in to resume processing mail.

Equipment Specifications

Physical Dimensions	<i>With Stacker Tray</i> Height: 4.53 in. (11.5 cm) Depth: 9.84 in. (25 cm) Length: 23.6 in. (60 cm)	<i>Without Stacker Tray</i> Height: 4.53 in. (11.5 cm) Depth: 7.09 in. (18 cm) Length: 10.6 in. (27 cm)
Weight	<i>With Stacker Tray</i> 3.02 lbs. (1370g)	<i>Without Stacker Tray</i> 2.16 lbs. (980g)
Electrical	100-240 VAC, 50/60 Hz	
Acoustical Noise	64 dBA	
Throughput	Up to 20 letters per minute	
Product Life	5 years or 20,000 cycles	
Environmental Limits	<p><i>Operating Limits °F (°C)</i> Temperature: 55 (13) to 95 (35) Humidity: 8% to 95% Maximum Wet Bulb Temperature: 80 (27)</p> <p><i>Storage Limits °F (°C)</i> Temperature: 15 (-9) to 120 (49) Humidity: 5% to 95% Maximum Wet Bulb Temperature: 85 (29)</p> <p><i>Transit (>24h) Limits °F (°C)</i> Temperature: -40 (-40) to 140 (60) Humidity: 5% to 100% Maximum Wet Bulb Temperature: 85 (29)</p>
